Professional Summary

Frontend Developer with 2+ years of experience building scalable, user-focused web applications using React and Next.js. Experienced in delivering enterprise and data-driven platforms for government and private sector clients.

Strong focus on performance, usability, and maintainable code, with a unique strength in **technical writing and documentation**, including creating user guides and structured documentation used for onboarding and AI model training.

Core Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI (MUI)

Tools & Workflow: Git, GitHub, REST APIs, Axios, Asana,

Strengths: Technical Writing, Documentation, UI/UX Collaboration, Debugging, Code Reviews

Professional Experience

Frontend Developer

KSolutions Consulting, Nigeria

- Developed responsive and scalable web applications using React, Next.js, JavaScript, MUI, and CSS
- Built reusable UI components and translated UI/UX designs into functional features
- Collaborated with backend engineers and designers to deliver production-ready applications
- Improved application performance and usability by debugging and optimizing frontend logic
- Contributed to enterprise systems used for operational workflows across government and private sector clients

- Wrote technical documentation and user guides to support onboarding and system usage
-

Key Projects & Platforms

HMIP – Housing Market Information Portal

(Housing research and data platform)

- Developed data-driven and interactive UI components for a housing research platform
 - Built features supporting structured data presentation and user navigation
-

Entwuit – E-learning Platform

- Built and maintained frontend features for an e-learning platform used by students and educators
 - Developed intuitive and accessible interfaces to enhance learning experience
 - Wrote structured user documentation guiding platform usage
 - Contributed documentation used in training AI models for educational workflows
-

Other Client Projects

- **LegalPro:** Developed dashboards and dynamic forms for legal workflow management
 - **Eparapo:** Built frontend features for a hospital management system (appointments & patient records)
-

Frontend Developer Intern

TIIDELab, Nigeria

- Collaborated in a team of 10 to build an Agritech platform focused on scalability and usability
 - Developed responsive UI components and contributed to product functionality
 - Participated in Agile workflows including sprint planning and task coordination
-

Additional Projects

GitHub Users App

- Built a React application integrating GitHub API to fetch and display user data
- Implemented search functionality and responsive UI

Weather App

- Developed a weather application using React and external APIs
 - Implemented geolocation and city-based search
-

Technical Writing & Documentation

- Created user guides and technical documentation for web applications and platforms
 - Simplified complex technical concepts into clear, user-friendly content
 - Produced documentation for onboarding and system adoption
 - Contributed documentation used in training AI models
 - Published technical articles on Hashnode (linked in portfolio)
-

Education

Bachelor of Engineering (Agricultural & Bio-Resources Engineering)
University of Nigeria, Nsukka

Certifications

Frontend Developer Certification — TIIDELab (2022)
